TUTORIAL:

1. **After you get your cards, start bidding.**

   If all players have not joined you will have to wait for others to join the game.

2. **Play your card**

   If everyone is done with previous step player one can start playing the game. Remember player who joins the game first, he is the one who plays the cards first.

3. **Hand winner**

   If Player X wins the hand he plays first in the next hand.

   Example:

Current hand:	1-2-3-4
	Player 2 wins.
Next hand:	2-3-4-1

4. **13 hand results**

   After everyone has played their 13 cards team scores will be declared and if score is greater than 250 for either team, the team with higher score wins.

   If no one wins then we again distribute the cards and step 2-3 are repeated. And turn will be in following order.

   1 -> 2 -> 3 -> 4 ->1

   Just follow the instructions on the screen. If you play wrong move or give wrong input, follow the error message to move on.
